APPLICATION DEVELOPMENT EXPERIENCE

Full-Stack Software Engineer | NOVICE NETWORK SOCIAL MEDIA PLATFORM

July 2023

Techstack: FastAPI, React, Bootstrap 5, PostgreSQL, React Hooks, JWTdown for FastAPI

- Created the backend endpoints for the login and logout functionality using JWTdown authentication so the user would be able to create an account to sign up and log in to use the social media platform
- Collaborated with team members on agile sprint planning and requirement gathering on user stories, database design, wireframes, and APIs design to deliver social media platform for bootcamp grads
- Conducted thorough testing, both unit and integration, to identify and rectify bugs, ensuring the delivery of a robust and reliable web application

Full-Stack Software Engineer | PRIMEAUTO: DEALERSHIP CAR MANAGEMENT

June 2023

APP Techstack: React, Bootstrap 5, Django, RESTful APIs, React Hooks,

- Implemented RESTful APIs and pollers to allow car, appointments, and sales information to be served to user endpoints in Django
- Utilized React and Bootstrap CSS to develop a responsive frontend with the ability to search for cars using VIN number

Full-Stack Software Engineer | CONFERENCE GO: EVENT MANAGEMENT APP

April 2023

Techstack: React, Bootstrap 5, Django, RabbitMQ

- Applied containerization technology to Dockerize microservices, providing a streamlined approach for managing dependencies and environment configurations.
- Built a full-stack app to visualize conferences, add presentations, locations, and attendees, and manage events using Python, Javascript, React, Django
